FireAngel

WG-1T WI-SAFE GATEWAY

Wi-Safe® CONNECT

Enabling real time monitoring and notification via the Wi-Safe Connect platform of domestic alarm installations.

Diameter 125mm
Depth 31mm
Weight 191g

Product Features

- The WG-1 gateway allows for all devices utilising Wi-Safe 2 wireless communication to connect to the internet. The diagnostic information held within an individual WS2 device is sent directly to a personalised cloud based dashboard, where alerts can be managed and responses initiated.

- For use with Fireangel devices based on the Wi-Safe 2 wireless technology.

- Connect to the Internet via an Ethernet cable Hub.

- 3 LEDs to indicate Power, Fault, and Communication.

- Power supply via enclosed power unit.
